PURPOSE:

The intent of this clinical policy is to provide coverage guidelines for *Humanitarian Use Devices* (HUD).

Please refer to the member's benefit document for specific information. To the extent there is any inconsistency between this policy and the terms of the member's benefit plan or certificate of coverage, the terms of the member's benefit plan document will govern.

POLICY:

Benefits must be available for health care services. Health care services must be ordered by a provider. Health care services must be medically necessary, applicable conservative treatments must have been tried, and the most cost-effective alternative must be requested for coverage consideration.

COVERAGE:

- I. *Humanitarian Use Devices (HUDs)* must be used according to the indication/s for which the FDA granted the *Humanitarian Device Exemption (HDE)*.
- II. When a device is being used in a clinical investigation (ie, collection of safety and effectiveness data) for its *HDE*-approved indication(s), or for a different indication, both of the following apply:
 - A. It must be used in a facility that has an established a local *institutional review board (IRB)* to supervise the clinical testing of the devices.
 - B. The facility *IRB* must approve the use of the device to treat or diagnose a specific disease.

Access the following for an up-to-date list of FDA/Center for Devices and Radiological Health (CDRH) Humanitarian Device Exemptions:

DEFINITIONS:**Humanitarian Use Device (HUD):**

Device that intends to benefit patients by treating or diagnosing diseases or conditions that affect fewer than 8,000 individuals in the United States per year. The HUD provision provides an incentive for the development of devices for use in the treatment or diagnosis of diseases affecting small patient populations.

Humanitarian Device Exemption (HDE):

For a device to obtain *HUD* approval, a *HDE* application must be submitted to the FDA. This is similar to a premarket approval application, but is exempt from the effectiveness requirements of a premarket approval. Application for *HDE* is not required to contain results of scientifically valid clinical investigations that demonstrate the device's effectiveness for its indication. The application must contain enough information for FDA to determine that the devices do not pose an unreasonable or significant risk of illness or injury, and that the probable benefit to health outweighs the risk of injury or illness from its use. The applicant must also demonstrate that there are no comparable devices available to treat or diagnose the disease or condition, and that the applicant could not otherwise bring the device to market.

Institutional Review Board (IRB):

Formally designated board, committee, or other group tasked to review, approve the initiation of, and conduct periodic review of biomedical research involving human subjects in accordance with 21 CFR 56. The IRB's purpose is to assure the protection of the rights, safety, and welfare of the human subjects.
